

## Scholarships for postgraduate students from Uruguay to study in the UK

Harper Adams University and the National Research and Innovation Agency of Uruguay (ANII) are providing five scholarships for PhD, MSc and MRes degrees at the British university.

### Subject areas:

- **Animal Production, Welfare and Veterinary Sciences**
- **Crop and Environment Science**
- **Agricultural Engineering**
- **Food Science and Agri-food Supply Chain Management**
- **Land, Farm and Agri-business Management.**

### ANII will contribute up to:

- \$20,000 for one year Masters programmes
- \$40,000 for two year Masters programmes
- \$60,000 for three year full and sandwich PhD programmes
- \$80,000 for four year full and sandwich PhD programmes

Two MSc/MRes scholars will be awarded a 50 per cent discount towards their tuition fees while all other applicants will receive a 20 per cent discount, including PhD scholars.

Prospective scholars have to first apply to the university for their course. Following acceptance, they can then apply to ANII for a scholarship which makes a significant contribution to the cost of their tuition fees, airline tickets, accommodation and health insurance.

*“I have many positives, but if I have to choose one it would be university life. Living on campus with students from all over the world was amazing. Sharing courses with people from so many different professional backgrounds is a very enriching experience. The University staff is extremely supportive which makes you feel safe and confident in every step you take. And having a masters degree from a British university such as Harper Adams is a gateway to many possibilities”*

*Antonella Riani,  
MSc International Agri-Business  
and Food Chain Management.*

*Foreign Trade Analyst at  
Bunge, Montevideo*

# Harper Adams University: tackling global challenges

Harper Adams University is a leading specialist institution tackling the future development of the planet’s agri-food production, processing, animal sciences, engineering, land management and sustainable business.

Established in 1901, the university has been delivering vital agri-food education for more than a century. Harper Adams University is part invention hub, part think tank, part industry, part 640 hectare farm.

We have a thriving and [growing international student community on campus](#), are creating ever more relationships with overseas institutions, and developing international research and study opportunities. Students come from more than 30 different countries, including Cameroon, Canada, Ghana, Indonesia, Iraq, Malawi, Nigeria, Poland, Serbia, Slovakia, Syria, Thailand and the USA.

Around a third of our research students are international, many from developing and emerging economy countries and are primarily working on food security projects.

*“Harper’s more than just a university, it’s more like a family. It’s been a unique and fantastic experience studying here.”*

Gustavo Barboza Martignone (from Uruguay),  
[MSc International Agri-business  
and Food Chain Management](#)
